

PROFESSIONAL SUMMARY

Staff Software Engineer with 8+ years architecting enterprise multimodal AI platforms, high-throughput distributed systems, and production LLM extraction pipelines. Proven track record scaling document intelligence workflows processing 10M+ docs/month.

CORE TECHNICAL SKILLS

Languages & Frameworks: Python, TypeScript, FastAPI, Next.js, PyTorch, SQLAlchemy, React, Go
AI & Multimodal: Claude Vision APIs, OpenAI, Transformers, LangChain, DocVQA, RAG, Tesseract OCR
Cloud & Infra: AWS (S3, ECS, Lambda), Docker, PostgreSQL, Redis, Kubernetes, Kafka, CI/CD

PROFESSIONAL EXPERIENCE

Staff AI Platform Engineer @ ScaleAI Technologies San Jose, CA 2023 - Present Specialized in building multimodal document intelligence architecture using vision models and dynamic JSON schema enforcement. • Reduced extraction latency by 45% using async pipeline queuing with Celery/Redis and PyMuPDF hardware acceleration. • Implemented human-in-the-loop verification portal cutting false positive validation rates from 8.2% to under 0.4%.	2023 - Present
Senior Backend Engineer @ NeuralDocs Inc. Seattle, WA 2020 - 2023 Built high-throughput concurrency OCR ingestion microservices handling 250+ requests/sec using FastAPI and PostgreSQL. • Engineered automated table detection & extraction parser converting complex scanned financial reports to structured JSON. • Deployed semantic Q&A search over multi-page contracts using hybrid vector embeddings and keyword BM25.	2020 - 2023
Software Engineer @ CloudMatrix Solutions Austin, TX 2018 - 2020 Designed and maintained REST APIs and real-time dashboard analytics with React and Python. • Automated infrastructure provisioning using Terraform and AWS CloudFormation.	2018 - 2020

EDUCATION & CERTIFICATIONS

Master of Science in Computer Science (Specialization: Machine Learning) University of Washington, Seattle GPA: 3.92 / 4.0	2016 - 2018
Bachelor of Science in Software Engineering University of Texas at Austin Magna Cum Laude	2012 - 2016
